<https://github.com/T9kezo>

Solan, Himachal Pradesh, India

## EDUCATION

### Shoolini University Solan, Himachal Pradesh

Bachelor of Computer Applications (BCA) - Full Stack Development

Aug 2022 – May 2025

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Web Technologies, Software Engineering, Operating Systems, Computer Networks

• Focus: Full Stack Web Development, Cloud Computing, and AI-Enhanced Development

## TECHNICAL SKILLS

**Programming Languages:** Python, PHP, JavaScript (ES6+), SQL, HTML5, CSS3

**Frontend Technologies:** React.js, Vue.js, Bootstrap, Tailwind CSS, jQuery, Responsive Design, Material-UI

**Backend Technologies:** Node.js, Express.js, Django, Flask, RESTful APIs, GraphQL, Microservices

**Databases:** MySQL, PostgreSQL, MongoDB, Redis, Firebase

**DevOps & Tools:** Git, GitHub, Docker, AWS (EC2, S3, Lambda), CI/CD, Linux, Nginx, Apache

**Data & Analytics:** Power BI, Excel (Advanced), Data Visualization, ETL Processes

**AI & Automation:** GitHub Copilot, ChatGPT API Integration, Prompt Engineering, AI-Assisted Development **Design**

**& Collaboration:** Figma, Adobe Photoshop, Agile/Scrum, Jira, Version Control, Code Review

## PROFESSIONAL EXPERIENCE

### Full Stack Developer Intern

Nov 2025 – Feb 2026

Unified Mentor

Remote, India

- Architected and deployed 5+ production-ready web applications using modern JavaScript frameworks (React, Node.js) with 99.9% uptime, serving 10,000+ monthly active users
- Optimized database queries and implemented caching strategies (Redis) reducing API response times by 60% and improving overall application performance
- Engineered responsive, mobile-first UI components achieving 100% cross-browser compatibility across Chrome, Firefox, Safari, and Edge, improving user engagement by 35%
- Collaborated with cross-functional teams using Agile methodologies to deliver 15+ features ahead of sprint deadlines, demonstrating strong project management and communication skills
- Integrated AI-powered tools (ChatGPT API, GitHub Copilot) into development workflow, increasing code quality and reducing development time by 25%

## KEY PROJECTS

### Real-Time Chat Application | Node.js, Socket.IO, Express.js, React, MongoDB

- Developed real-time messaging platform with instant communication, user authentication, and message history supporting
- Implemented WebSocket connections using Socket.IO for bi-directional communication with optimized message queuing to handle high-volume traffic with minimal latency

- Designed responsive UI with React enabling seamless user experience across desktop and mobile devices

## Weather Application | JavaScript, Weather API, HTML5, CSS3, REST API

- Built weather application providing real-time weather information, 7-day forecasts, and location-based updates with intuitive interface
- Integrated third-party Weather API with error handling and fallback mechanisms ensuring reliable data retrieval
- Implemented geolocation features and city search functionality with auto-complete for enhanced user experience

## Cruise Ship Management System | JavaScript, HTML5, CSS3, JSON

- Developed comprehensive management system for cruise operations with booking management, passenger tracking, and administrative features
- Created interactive dashboard for real-time monitoring of bookings, capacity management, and revenue analytics
- Implemented data validation and form handling ensuring accurate passenger information and smooth booking workflows

## ACHIEVEMENTS & CERTIFICATIONS

---

### GenAI Powered Data Analytics Job Simulation — Tata

A practical simulation focused on leveraging Generative AI tools for data analytics tasks, covering AI-driven insights, data interpretation, and applying GenAI in business decision-making scenarios.

### Software Engineering Job Simulation — JPMorgan Chase

A hands-on simulation replicating real-world software engineering tasks at JPMorgan Chase, including working with financial systems, improving application interfaces, and applying industry-standard development practices.
